MOBILITAS – AGS Group fortifies its exceptional presence in Central Europe with new Bosnian facilities

Sarajevo (Bosnia), 21 September 2022 – The MOBILITAS Group – AGS – will soon begin construction of a 1 650m² warehouse in Sarajevo, Bosnia. With this project, the French family-owned SME that specialises in removals, records management, relocation and heritage preservation aims to strengthen its footprint across Central Europe and consolidate its Bosnian activities under its flagship AGS brand.

As the new home of AGS Sarajevo, the construction project is the group's first opportunity to own premises in Bosnia since it began operating in the country in 1997. The new site will come complete with a centre dedicated to records storage and digitisation as well as a warehouse space for household goods removals.

"We are excited to break ground on this new development. It is an investment that signals our intent to deepen our relationship with our Bosnian clients and a sign of our confidence in the future of Bosnia," commented Cedric Castro, CEO of the MOBILITAS Group.

Situated in the capital city's Novi Grad district, the new premises are close to AGS Sarajevo's current facilities. This allows the branch to maintain its proximity to clients while operating from a facility that is 50% larger.

The growing business of records management

The expansion is much needed following the group's acquisition of two Bosnian records management providers earlier in the year.

Once construction is complete in 2023, all records will be stored together in the new records management centre which will have a capacity of 41 000 boxes. The companies themselves will operate under AGS Records Management, the MOBILITAS Group's flagship records management brand.

As with the other construction projects masterminded by MOBILITAS, the new facilities will be equipped with a state-of-the-art security system, access control and fire suppression equipment in line with European standards.

Fortifying AGS in Central Europe

AGS entered the Central European market in 1993 when it opened AGS Poland in Warsaw after the collapse of the Berlin wall. Operations soon expanded and, within less than a decade, AGS subsidiaries could be found throughout the region. The group is now looking to fortify its presence through acquisition and construction.

AGS Croatia and AGS Montenegro are next in line to get new premises, with construction expected to be completed in 2023. Other facilities will follow.

About the MOBILITAS Group, holding company of AGS

Founded 48 years ago, the MOBILITAS Group is a family-owned mid-sized company that specialised in the mobility of goods and people before diversifying into physical, digital records management and heritage conservation. With more than 4 000 employees in 97 countries, the MOBILITAS Group – led by the third generation of the TAIEB and CASTRO families – is today one of the world leaders in international mobility (relocation of companies and individuals, support for executives on assignment) and continues its progress towards the podium of the largest players in physical and digital records management and heritage conservation.
